

JXL announced as finalist for Atlassian Partner of the Year 2023 in three categories

SYDNEY, 20 March 2024 – JXL is a finalist for the *Atlassian Partner of the Year 2023* in three categories: *Cloud Transformation Apps*, as well as *Agile & DevOps App Solutions*, and *Work Management App Solutions*. This is an acknowledgement of their outstanding work for Atlassian customers during the calendar year 2023. This includes exceptional efforts in developing new business and driving innovative app solutions for customer success.

"We are consistently amazed by the outstanding Partner Award nominations we receive from our partners every year," expressed Keran McKenzie, Head of Ecosystem at Atlassian. "Earning recognition as a finalist in an award category is a testament to the extensive expertise and dedication of our partners in innovating for Atlassian customers. It's genuinely exciting to highlight some of our top partners within these categories across the Atlassian Marketplace."

About Fine Software

Sydney, Australia-based Fine Software Group was founded in 2020 with the mission to craft beautiful software that really helps people get their job done. In March 2021 the company took in seed funding from [Atlassian Ventures](#). Co-founders Daniel Franz and Hannes Obweger have more than 15 years of combined experience leading teams at Atlassian, in addition to founding several other businesses, including the Roadmaps for Jira add-on (acquired by Atlassian and now part of Jira Software). The company's main product is JXL, an app that enhances Atlassian's flagship product Jira. Visit fine.software/press for more information and resources.
